## **Change Your Life!**

On June 20, 2026, the starting bells of the Austria eXtreme Triathlon will ring for the eleventh time in the Mur floodplains south of Graz. With them begins a journey that is far more than a race – it is a test of body, mind, and willpower.

Over 230 kilometers, around 6,000 meters of elevation gain, and the rugged beauty of Styria will demand everything from you. This course rewards courage, endurance, and the determination to keep moving forward when it gets tough.

**The Austria eXtreme Triathlon stands for the essence of sport: community, fairness, and respect – for nature, for your fellow athletes, and for your supporters.**

What has proven itself remains; details continue to evolve.

**Update:** The briefing will be available online on the homepage from June 15, 2026, and viewing it is mandatory!

**The closing ceremony at the ÖHA in Öblarn** will once again provide a fitting finale to an intense weekend.

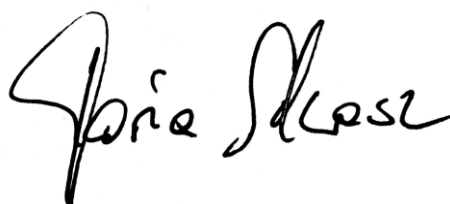

**This Stroßnbuach** accompanies you throughout the entire event – with all important information on the course, transition zones, hazard points, and the schedule, from registration on Friday to the closing ceremony on Sunday.

**Please read all instructions carefully.**

The demanding course requires constant attention and flexibility. Always follow the latest updates regarding possible course adjustments and support one another whenever it is needed.

**The organizing team wishes you an emotional, fair, and unforgettable race – and above all, a safe 11th Austria eXtreme Triathlon.**

When it comes to overcoming of altitude difference, the biking distance is the most difficult part of the Triathlon.

Take care, you have to pace yourself and choose a suitable speed.

### Gaberl

When having reached the „Gaberl“, a former Roman road, you can see the Dachstein for the first time. Now it goes down steeply.

### Lachtal

When having reached the „Kammersberg“, you get rewarded by the beautiful view of the scenery.

The „Burg Rothenfels“ in the „Wölzertal“ is one among the few medieval castles which kept its former look.

### Sölkpass

The „Sölkpass“ with its slopes between 8 to 12% rises in front of you now. It connects the valley of the river Enns in the North with the upper part of the river Mur in the South and thereby crosses the „Schladminger Tauern“.

When having reached the „Sölkpass“ you are 1790 metres above the sea level. For all the efforts you have taken you will get rewarded with a beautiful descent to the valley. „Warning, dangerous descent!“

## **Dachstein**

The Dachstein, the first glacier of the Alps from an eastward direction, is one of the five most visited destinations in Styria. Just approaching with the Dachstein-cable-car is already an adventure on its own. Without any pillars you overcome 1.000 meters difference in altitude just within 6 minutes, while passing steeply dropping cliffs and rocks. And as soon as you reach the Dachstein-glacier you will face a terrific high-mountains-landscape offering probably the widest choice of activities in the whole alp-area.
